

NDIS Progress Note

Participant Support Documentation Summary

Participant	Participant	Date of Support	July 16, 2026
Support Worker	Not specified	Document Generated	July 16, 2026 01:19 PM
Consent Noted	Not documented		

SUBJECTIVE

Mr. Mike reported experiencing a head injury and expressed a need for support with activities related to managing its effects. He mentioned difficulty with balance and coordination, and a desire to engage in structured support to improve daily functioning.

OBJECTIVE

Observed mild balance issues during movement, limited range of motion in the neck, and verbal reports of fatigue during task completion. No immediate signs of neurological deterioration.

ASSESSMENT

The head injury appears to impact Mr. Mike's mobility and coordination. His self-reported fatigue suggests potential cognitive or physical strain, requiring tailored support to maintain independence.

PLAN

Implement head injury support activity focusing on balance exercises and adaptive task completion. Schedule follow-up review in 2 weeks to monitor progress.

PARTICIPANT VOICE

Expressed clear need for structured support post-injury, preference for activities that address mobility challenges, and proactive engagement in rehabilitation planning.

SUPPORT TYPE PROVIDED

Head Injury Support Activity

RISKS / INCIDENTS
