

Individual Contribution Statement & Self-Evaluation

Assignment 6: Final Presentation

Part A: Student & Group Information

Student Name:	Shreyas Dhakal
Student ID:	A3189831
Group Name & Number:	Algorithmic Decision Making, Number 8

Part B: Individual Contribution Statement

1. Specific Contributions

Describe the specific tasks, sections, or deliverables you were responsible for. Be detailed and factual. (150–300 words)

The first task I did was read all the literature reviews and proposed a common ethical question. I helped the team schedule meetings and assigning the tasks. My section was finding the evidence for and against the ethical question for our group. To do this, I researched relevant papers to the topic and also adopted the papers that were already present in the groups' literature reviews. I also compiled the information for AI failure modes, which was eventually put in the assignment. These were the direct contributions from my side, although I also helped in making the designing the presentation, reviewing the work of every team member and providing my feedback where it was required. In addition to these tasks, I also arranged an in-person meeting with my team members to rehearse the presentation, and also do a mock questioning session, so that any gaps in the discourse were answered.

2. Estimated Contribution (%)

Indicate the approximate percentage of overall work you contributed to the group assignment.

My estimated contribution:	25%
-----------------------------------	-----

3. Engagement Level

Rate your engagement and participation throughout the project. Tick the most appropriate box.

- ☒ Highly Engaged – Consistently attended meetings, met all deadlines, actively contributed ideas and feedback.
- ☐ Engaged – Attended most meetings, met most deadlines, contributed regularly.
- ☐ Moderately Engaged – Attended some meetings, occasionally missed agreed deadlines, contributed when prompted/reminded.
- ☐ Minimally Engaged – Rarely attended meetings, missed multiple deadlines, limited contribution.

Provide additional comments on your engagement (e.g., challenges faced, how you managed your time). (100–200 words)

The main challenge I faced was with coordinating with everyone to arrange online and in-person meetings. Due to the semester ending, there was a huge workload for everyone, so it took a lot of time to arrange meetings. I had to plan my timings a day or two beforehand just for a short 15-minute meeting. Generally, just starting a meeting whenever everyone replied in the WhatsApp group worked effectively, as all the team members would be free when they replied. Another challenge was to divide the work fairly and equally for everyone. There was some conflict between a number of members wanting a same portion of the document and it took some time to resolve.

Part C: Ethical Conduct Declaration

Confirm your adherence to academic integrity and ethical conduct within your team by ticking each statement that applies.

- ☒ I completed my assigned tasks independently and did not misrepresent others' work as my own.
- ☒ I properly cited and referenced all sources used in my contributions (including use of AI tools).
- ☒ I communicated respectfully and constructively with all team members.
- ☒ I did not engage in any form of academic misconduct (e.g., plagiarism, contract cheating, collusion).
- ☒ I disclosed and discussed any difficulties that affected my participation.

If applicable, describe any ethical concerns or issues encountered during the group work. (50–100 words)

Part D: Self-Reflection

Reflect on your overall experience working in this group. What did you learn? What would you do differently? (100–200 words)

My overall experience working on this project was great, especially with teammates who were willing to do their part and beyond to help others as well. I learned mainly about different perspectives and approach to the same topic in ethical AI. This assignment also provided me a chance to improve my existing communication skills and in particular, working with cross-cultural teammates. If there was something I would do differently, that would be planning meetings beforehand so that everyone could arrange their time schedules around the meeting instead of doing vice versa. And I think I would approach the discourse in a different way than how we approached. We approached it as a presentation, but we should have approached it as a discourse itself and make the presentation a secondary task.

Student Declaration

I declare that the information provided in this Individual Contribution Statement is true and accurate to the best of my knowledge.

	13 June 2026
Student Signature	Date

Part E: Peer Verification Confirmation

This section is to be completed and signed/acknowledged by all team members.

We, the undersigned team members, confirm that the Individual Contribution Statement above is a **fair and accurate** representation of the named student's contributions, engagement, and ethical conduct during this group assignment.

Team Member Name	Student ID	Signature / Acknowledgement	Date
1. Shihao Cai	A1799366	I acknowledge that the statement is fair and accurate	13 June 2026
2. Avishkar Waikar	A3189970	I acknowledge that Shreyas's statement is fair and accurate	13 June 2026
3. Xuefeng Lu	A3211678	I acknowledge that the statement is fair and accurate	13 June 2026

Peer Comments (Optional)

If any team member wishes to note a disagreement or add context regarding the above statement, please do so here:

Note: As part of the marking process, any discrepancies between team members' statements may result in further investigation. All team members are encouraged to be honest and constructive in their responses.
